TO HIS EXCELLENCY

COUNT BRUHL, &c. &c.

SIR,

THE natural ſentiments of a grateful heart preclude, on this occaſion, the neceſſity of looking out for a diſtinguiſhed Patron, to whom I might with confidence and propriety dedicate the following ſheets. Should you kindly accept the little offering I have the honor to lay before you, I ſhall enjoy the double ſatisfaction of having in the ſame inſtance preſented it to a man of the niceſt diſcernment, and to a friend.

Pardon, Sir, the liberty I here take; inveterate habits of the moſt friendly indulgence, have long and unalienably familiarized the pleaſing idea to my mind; and it is in that flattering perſuaſion, that I am induced to truſt to your candor on the ſubject of, perhaps, a *ſerious amuſement*; in the cultivation of which, I may in conſcience boaſt of having acquired ſome degree of celebrity. I have ſaid ſerious,

for in truth, and you well know it, its purſuit is almoſt unremittingly productive of problems, not unworthy of the ſolution of genius; and whoſe extent and intricacy elude even the ſuſpicion of ordinary minds.

Permit me then, Sir, to inſcribe your reſpectable name, in oppoſition to frivolous or derogatory opinions, for who, better than your Excellency, perceives the obvious analogy between the Game of Cheſs and the exertions of all human policy: where, in fact, Kings, Queens, Knights, Biſhops, and the more ſubordinate ranks, actuated by honors or intereſt, intrench themſelves under their reſpective towers, or poſſeſs themſelves of ſituations beſt adapted to their worldly views.

I have the honor to be, with great reſpect and gratitude,

Your, Excellency's,
moſt obliged, and moſt
obedient humble ſervant,

A. DANICAN PHILIDOR.

PREFACE.

SEVERAL learned authors have publiſhed their inquiries on the origin of Cheſs. I will not venture to give my opinion on their conformity with the *Latrunculi* of ancient Rome. The Chineſe play at Cheſs; but their game is nothing like ours, either in the moves of the Pawns or the ſtrength of the Pieces. The Arabians very probably brought this game into Europe; and their authors aſcribe its invention to the Indians. Though Cheſs has contributed to the amuſement of the greateſt heroes, for many ages paſt, the Spaniards and Engliſh ſeem to have been principally engaged in it, ſince the firſt treatiſes on that ſubject have been printed in thoſe languages; nevertheleſs, Italy exceeds them in the number of volumes; and the IV. *Bücher vom Shach und Königs Spiel* of the duke of Brunſwick, publiſhed under the fictitious name of Guſtavus Selenus, conſtitute the whole of what Germany offers us of any conſequence on the game. France has at all times had good players, but they have neg-

lected to impart their diſcoveries to the public; and, I believe, I am the firſt of my nation who has taken upon himſelf to ſet forth, in a true light, the theory and practice of this game. This work is divided in two parts, the firſt is chiefly compoſed of the Editions of 1749 and 1777, the ſecond contains a great number of new methods of beginning and finiſhing the game, not only uſeful but neceſſary to be known. At the deſire of ſeveral gentlemen, amateurs of the game, I have added different parties, played by me without ſeeing the board, againſt three adverſaries at once, and have given their names.

As I attribute the ſucceſs of my two firſt editions to the notes that accompany them, and ſerve to give general rules of the game, I have here followed the ſame method, and flatter myſelf of having brought to ſome degree of perfection the theory of a game, that learned authors, ſuch as *Leibnitz* and others, have claſſed among the ſciences.

ANALYSIS

OF THE

GAME OF CHESS.

FIRST PARTY,

With two back games; the first beginning from the twelfth, and the second from the thirty-seventh move, of the Black.

7.

Bl. The Q. B. P. one move.

NOTES.

(a) This Pawn is puſhed two ſteps, for two reaſons: the firſt, to hinder your adverſary's King's Biſhop from attacking your King's Biſhop's Pawn; the ſecond, to bring the ſtrength of your Pawns into the centre of the cheſs-board.

(b) When you find your game in the preſent ſituation, *viz.* two Pawns in a front line, you muſt take care not to puſh either of them, before your adverſary propoſes to change one for the other: which you will then avoid, by puſhing forwards the attacked Pawn.

(c) If, inſtead of being withdrawn, this Biſhop gives check, you are to cover the check with the Biſhop; and, in caſe he takes your Biſhop, you muſt retake the Biſhop with your Knight, who will then defend your King's Pawn.

N. B. In the former edition, the Author thought it beſt not to be preciſe in the direction of this move, in order that he might have an opportunity of giving ſeveral examples, on the beſt way of playing the Pawns.

(d) Great care muſt be taken not to play the Knight to his Biſhop, third ſquare, before the Biſhop's Pawn has been puſhed two ſteps; becauſe, otherwiſe, the Knight would prove an hindrance to the motion of the Pawn.

N. B. The black, on that move, could take the white King's Pawn; and afterwards puſh the Queen's Pawn two ſteps, which would break the centre of the white.

NOTES.

(e) The Biſhop retires, to avoid being attacked by the adverſary's Queen's Pawn, becauſe you would then be forced to take his Pawn with yours, which would ſeparate your Pawns.

(f) He plays this Pawn to give an opening to the Rook; and this cannot be hindered, either he or you take.

(g) You ſhould not take the Pawn which is offered you, becauſe your King's Pawn would then loſe its column; whereas, leaving yours to be taken, you ſupply its place by the Pawn of your Queen, and ſuſtain it afterwards with your King's Biſhop's Pawn: theſe two Pawns united will undoubtedly win the game.

(h) He takes the Pawn to purſue his deſign, which is, to give an opening to his Rook.

(i) He plays this Biſhop, to enable him to puſh afterwards his Queen's Biſhop's Pawn: you could, it is true, oblige him to double a Pawn, by taking his King's Biſhop with that of your Queen, but this would make an opening to his Queen's Rook: beſides, a double Pawn, when tied to other Pawns, is by no means diſadvantageous; however, the preſent move will be the ſubject of a back game, making him take your Queen's Biſhop with that of his King.

NOTES.

(k) Your King's Pawn being as yet in no danger, your Knight attacks immediately his Biſhop, in order to take him, or have him removed.

(l) It is always dangerous to let the adverſary's King's Biſhop ſtand on the direct line, which attacks your King's Biſhop's Pawn; and, when your Queen's Pawn cannot cloſe that direction, it is neceſſary to oppoſe him by your Queen's Biſhop, and take his Biſhop for every other piece, as ſoon as an occaſion offers.

(m) You caſtle on that ſide, in order to ſuſtain and ſtrengthen your King's Biſhop's Pawn, which you will advance two ſteps as ſoon as your King's Pawn is attacked.

(n) He is forced to puſh this Pawn, to hinder you from playing your King's Biſhop's Pawn upon his Queen, which would give you two Pawns in a front line upon his ground.

(o) This Pawn is played to enable you to puſh your King's Knight's Pawn two ſteps.

(p) He plays this Pawn to hinder your Knight entering into his game, and forcing his Queen to remove, which would immediately make an open field for your Pawns.

NOTES.

(q) You play this Knight to enable yourſelf to puſh your King's Biſhop's Pawn next, which will be then ſupported by three pieces, the Rook, the Biſhop, and the Knight.

(r) He plays this Knight, in order to cut off the communication between your pieces, and break the ſtrength of your Pawns; which he would undoubtedly do, by puſhing his King's Knight's Pawn; but you prevent his deſign, by ſacrificing your Rook.

(s) You play that Rook to ſupport your King's Pawn, which would be left in the lurch, were you to puſh your King's Biſhop's Pawn.

(t) The Queen returns to this ſquare, in order to hinder the check-mate, now ready prepared.

(u) The Queen offers to be exchanged with the other Queen, in order to break the ſcheme of a check-mate, by the Biſhop and the adverſary's Queen.

NOTES.

(x) You are to obſerve, that when your Biſhop runs upon the white ſquares, you muſt put your Pawns upon the black ones; or, if your Biſhop runs upon the black, you muſt have your Pawns upon the white; becauſe, then, your Biſhop may prevent the adverſary's pieces getting between your Pawns. This rule is hardly ever to be diſpenſed with, in caſe you attack, and have ſome Pawns advanced; but, in caſe of a defence, the rule muſt be reverſed, and the Pawns ſet upon the Biſhop's colour.

(y) Here is an example of the above-mentioned note: if your Biſhop was black, your adverſary's King might get in between your two Pawns.

(z) As the King may retire to his Biſhop's ſquare, we will make it the ſubject of a ſecond back game.

Wh. The Q. at her K. B. second square.
Bl. The Q. Kt. at his Q. B. third square. *(d)*

NOTES.

(a) It is abſolutely neceſſary to puſh this Pawn two ſteps to prevent your adverſary from bringing his Pawns into the centre of the board, which he certainly could do by puſhing his Queen's Pawn two ſteps, and attacking your Biſhop, which would give him the move and attack upon you.

(b) Had he puſhed his Queen's Pawn two ſteps, inſtead of taking, it would have quite altered the game, ſo we will make it the ſubject of a back game.

(c) He has two reaſons for playing this Biſhop: the firſt is, to puſh his Queen's Pawn, in order to make room for his King's Biſhop; the ſecond, to oppoſe it to your King's Biſhop, and gret rid of him in time, according to the rule preſcribed in the firſt game. Page 7.

(d) If, inſtead of getting out his pieces, as he does by playing his Knight, he ſhould continue to puſh on his Pawns, he might eaſily loſe the game: it muſt be obſerved, that one or two Pawns, too far advanced, may be reckoned as good as loſt, except when all the pieces have an open field to protect them, or when the ſame Pawns may be ſuſtained or ſupplied by others. This will be ſhewn by a back game that will convince you, that two Pawns in a front line, ſituated upon the cheſs-board's fourth ſquare, are better than upon the ſixth ſquare.

NOTES.

(e) He puſhes this Pawn two ſteps to prevent your Pawns falling upon his.—Here it muſt be obſerved, two equal bodies of Pawns are on the board: you have four to three on your King's ſide, and he likewiſe has four to three on his Queen's ſide; he that is firſt able to ſeparate his adverſary's Pawns, on the ſide where they are moſt in number, will undoubtedly win the game.

(f) This move is moſt material, becauſe by puſhing his King's Rook's Pawn one move, he would immediately cut off the communication between your Pawns: your King's Knight's Pawn could not then join that of your Biſhop, without being expoſed to be taken by his Rook's Pawn.

(g) Though a Rook is commonly a better piece than a Knight, yet your game may be better than his: becauſe, notwithſtanding this loſs, your King is ſafe, and you are the better enabled to form your attack on which ever ſide your adverſary may chuſe to caſtle.

NOTES.

(b) It is eſſential to play your Queen to ſuſtain your King's Knight's Pawn, leaſt he ſhould ſacrifice his Biſhop for your two Pawns, which he certainly would do; becauſe all the ſtrength of your game conſiſting in your Pawns, the breaking of them would give him the attack upon you, and probably make you loſe the game.

(i) You play this Biſhop in order to engage your adverſary to puſh his Queen's Biſhip's Pawn, which would give you the game very ſoon, by making an opening for your Knights.

(k) He caſtles on that ſide to avoid the ſtrength of your Pawn upon his King, and the more ſo, becauſe they are already farther advanced than thoſe on the ſide of your Queen.

(l) Had you given him check with this Knight, you would have entangled your Biſhop, and loſt many moves: it is therefore better to go back.

(m) He brings back his Queen to her own home, with a deſign to put her next at her King's Biſhop's ſquare, and better ſuſtain his Queen's Biſhop's Pawn.

NOTES.

(n) You play this Knight with a view to purſue your attack on his Pawn.

(o) He plays this Pawn in order to gain a move, and to hinder your King's Knight from placing himſelf at your Queen's Knight's third ſquare; but as this move may be play'd otherways, it will be the ſubject of a back game.

(p) Let him now play what he will, all is loſt for him; becauſe your Knights have got a free paſſage into his game.

(q) If his King takes your Queen's Biſhop, you have his Queen by a diſcovered check upon him; and if he removes his King elſewhere, he loſes his Queen's Biſhop.

(r) The Queen next takes the adverſary's Queen's Pawn, expoſes every one of his pieces, and wins the game.

7.

Bl. The Q. Kt. at his Q. ſecond ſquare. *(c)*
Wh. The Q. P. one move.

NOTES.

(a) It is always advantageous to change your King's Biſhop's Pawn for his King's Pawn, becauſe, by that means, your King's and Queen's Pawns may place themſelves in the centre of the cheſs-board; beſides, in caſtling on the right wing, your Rook finds itſelf free and able to act from the very beginning of the game, as will be ſhewn by a back game on the ſame play.

(b) If your adverſary refuſes taking your Biſhop's Pawn, you are ſtill to leave it expoſed, and not move it forward until he has caſtled; and you muſt afterwards, with the Pawns of your right wing, form your attack upon the Pawns which cover his King, as is explained in a back game on that move. You are alſo to obſerve, as a general rule, not to determine eaſily to puſh on the Pawns of either your right or left wing before your adverſary's King has caſtled, becauſe he will otherways retire on the ſide where your Pawns are leſs advanced, and conſequently leſs able to hurt him.

(c) Should he take your Knight with his Biſhop, you muſt take his with your Pawn, in order to bring the ſtrength of your Pawns towards the centre.

11.

Bl. The K. Kt. at his R. fourth ſquare. *(f)*
Wh. The Q. at her K. third ſquare.

NOTES.

(d) This is the beſt ſquare your King's Biſhop can chuſe, except the fourth of your Queen's Biſhop: in that place he may be of uſe in forming your attack upon the King's Rook's Pawn, in caſe he caſtles on his left ſide.

(e) If he had caſtled on his Queen's ſide, it would then have been your game to caſtle on your King's ſide, in order to attack him afterwards more eaſily with the Pawns on your left. Again, it being neceſſary to obſerve, as a general rule, that as it is often dangerous to attack the adverſary too ſoon, here likewiſe you muſt be reminded not to be too haſty in your attack, until your Pawns are previouſly ſuſtained by one another, and alſo by your pieces, otherways thoſe premature attacks will be unſucceſsful, as ſhall be ſhewn by a back game on this play.

(f) He plays the Knight to make room for his King's Biſhop's Pawn, with a deſign next to advance it two ſteps to try to break the line of your Pawns.

17.

Bl. The Q. R. at its K. B. ſquare.
Wh. The K. caſtles with his Q. R.

NOTES.

(g) If he had puſhed his King's Biſhop's Pawn two ſteps, inſtead of taking your Biſhop, you ſhould then have attacked his Queen with your Queen's Biſhop, and then puſhed your King's Rook's Pawn upon his Biſhop, to force him to take your Knight; in this caſe your beſt way would be to retake his Biſhop with your Pawn, in order the better to ſupport your King's Pawn, and replace it in caſe it be taken.

(b) If he did not take this Knight, his Biſhop would remain impriſoned by your Pawns; or he would loſe three moves, which loſs would entirely ruin his games.

(i) He plays this Rook with the deſign either to attack and remove your Queen, or to double it, if neceſſary, with his other Rook.

(k) You puſh this Pawn two ſteps, to give room to your Queen, in caſe your adverſary attacks her with his King's Rook.

Bl. The Q. B. P. two moves.
Wh. The K. P. one move. *(l)*

19.

Bl. The Q. P. takes the P.
Wh. The Q. P. one move.

NOTES.

(l) Here is a move as difficult to comprehend as to be well explained; in the firſt place you are to obſerve, that when you find yourſelf with a ſtring of Pawns following one another, the Pawn which is at the head of them muſt ſtrive to preſerve its poſt, your King's Pawn not being upon the ſame coloured ſquares, or in oblique line with the others, your adverſary has puſhed his Queen's Biſhop's Pawn for two reaſons; the firſt, to engage you to move forward your Queen's Pawn, which would then be ſtopped by that of his Queen, and by that means to render uſeleſs your King's Pawn thus left behind; the ſecond is, to prevent at the ſame time your King's Biſhop from battering upon his King's Rook's Pawn, you ought therefore to puſh your King's Pawn forward upon his Rook, and even ſacrifice it, becauſe your adverſary by taking it, opens a free paſſage to the Pawn of your Queen, which you are to advance immediately, and ſuſtain in caſe of need, with your others, in order to try to make a Queen with it, or draw ſome other conſiderable advantage from it, to win the game. It is true that his Queen's Pawn being now on the ſame line with its King, appears to have the ſame advantage of having no oppoſition from your Pawns to make a Queen, however the difference is great, becauſe his Pawn being

entirely ſeparated and incapable of being joined to, or ſuſtained by any of the others, will always be in danger of being ſeized on its road by any of your pieces at war with it. This move, as I obſerved before, is very difficult; and one muſt be already a good player to judge well of it.

(m) It was neceſſary to play this Knight, in order to ſtop his King's Pawn; the more ſo, becauſe this very Pawn, in its preſent ſituation, ſtops the paſſage of its own Biſhop, and even of its Knight.

(n) He plays his Queen, in order afterwards to give check, but if, inſtead of playing her, he had puſhed his King's Rook's Pawn, to hinder the attack of your Knight, you muſt have puſhed your Queen's Pawn one ſtep, which would have inſured you the game.

(o) He takes this Biſhop to ſave his King's Rook's Pawn; beſides, that Biſhop proves more incommodious to him than all your other pieces, and by this play he keeps your Queen's Rook in check with his Queen.

(p) Having the advantage of a Rook againſt a Biſhop, towards the end of a party, you will gain by changing the Queen; becauſe, his Queen is troubleſome to you in her preſent ſituation, and to avoid the check-mate, he finds himſelf under the neceſſity of taking her.

NOTES.

(a) This Pawn is very ill played at the ſecond move, becauſe by puſhing your Queen's Pawn two ſteps, you regain the advantage of the move.

(b) If, inſtead of this Pawn, he had moved the King's Knight to his King's ſecond ſquare, you would have puſhed your King's Pawn forwards, and ſuſtained it afterwards with your King's Biſhop's Pawn.

(c) If, inſtead of puſhing this Pawn, he had moved his Queen's Biſhop to his King's third ſquare, you muſt have moved your King's Biſhop to his Queen's third ſquare; and then the ſituation of the game would have been exactly as it is at the ſixth move of the Second Party: but if he had attacked your Queen with his Queen's Biſhop's Pawn, he would have played very ill, becauſe the Pawn at the head of thoſe which are on his Queen's ſide would be left behind. *Vide note (l).*

(d) It is a general rule, that you muſt avoid changing your King's Pawn for your adverſary's King's Biſhop's Pawn. You are to obſerve the ſame rule with regard to your Queen's Pawn againſt his Queen's Biſhop's Pawn; becauſe it is proved, that the King's and Queen's Pawns are better than the others; ſince they, occupying the centre, hinder your adverſary's pieces from taking the moſt advantageous poſts.

(f) When you have two bodies of Pawns ſeparated, you muſt always ſtrengthen the ſtrongeſt ſide, by uniting at the centre as many Pawns as you poſſibly can.

NOTES.

(h) By the puſhing of this Pawn you obſtruct the game; but you will always have it in your power to make an opening with your King's Rook's Pawn, as ſoon as your pieces are all ready to form and ſuſtain your attack.

(i) You caſtle on your Queen's ſide to have a more free attack on your right; but, if inſtead of caſtling you take the Pawn offered to you, you thereby reunite in the centre your adverſary's Pawns, which would prove no ſmall hindrance to all your pieces.

(k) Had you taken the Knight with your Queen's Biſhop, you had fallen into the error above-mentioned of reuniting his Pawns in the centre.

(l) He plays this Biſhop to replace his King's Knight's Pawn, in caſe it be taken.

(m) He plays this Pawn to attack the Knight that covers your King, having nothing better in his power; for by taking your Pawn he would equally loſe the game.

Bl. The K. B. at his Kt. ſecond ſquare. *(b)*

5.

Wh. The K. R. P. two moves. *(c)*
Bl. The K. R. P. one move. *(d)*

NOTES.

(a) Inſtead of that move, you might have puſhed your King's Rook's Pawn two ſteps, which would have changed the game. This will be the ſubject of a back game.

(b) If, inſtead of playing this Biſhop, he had moved his King's Knight's Pawn one ſtep, it would make another game. A freſh ſubject for a back game.

(c) By playing this Pawn you force him to defend his King's Knight's Pawn with that of his Rook, by which move you keep his King's Knight confined, nor can he then get out without leaving his Pawns expoſed to be taken.

(d) There were two other ways of playing this; the firſt, by puſhing his King's Biſhop's Pawn one ſtep, in which caſe you ſhould ſacrifice your Knight, in order afterwards to give check with your Queen, which would inſure you the game; the ſecond, by puſhing his King's Knight's Pawn one ſtep upon your Knight. Another ſubject of a back game.

Bl. The Q. B. P. one move. *(f)*

8.

Wh. The Q. at her K. ſecond ſquare.
Bl. The Q. B. at the adverſe K. Kt. fourth ſquare. *(g)*

NOTES.

(e) If, inſtead of that move, he had advanced one ſtep his Queen's Biſhop's Pawn, you muſt have played that of your King, in order afterwards to take by the way his Queen's Pawn, in caſe he was to puſh it two moves, with a deſign to obſtruct your King's Biſhop. Another ſubject for a back game.

N. B. You are to obſerve, that in the attack of Gambits, the King's Biſhop is undoubtedly the beſt piece, and the King's Pawn the beſt Pawn.

(f) If, inſtead of moving this Pawn, he had played his Queen's Biſhop either to his King's third ſquare, or to your King's Knight's fourth ſquare, he might have loſt the game two different ways. This will be the ſubject of two back games on the ſame moves.

(g) He may now without any danger play his Biſhop on this ſquare, as your Queen can no more double your King's Biſhop by attacking his two Pawns; but if, inſtead of that move, he had played his ſame Biſhop to his King's third ſquare, he would have loſt the game. The ſubject of a back game.

18.

Wh. The Q. takes the P.
Bl. The Q. takes the Q.

NOTES.

(b) It is very material in the attack of Gambits, not to ſpare your Pawns on the King's ſide, and even to ſacrifice them all, if it be requiſite, though merely for the ſake of the adverſary's King's Pawn, becauſe it hinders your Queen's Biſhop from coming into play, and joining the pieces that form your attack.

(i) If, inſtead of playing that Biſhop, he had taken your's with his Queen, or had taken your Knight with his Queen's Biſhop, he would have loſt the game.

25.

Wh. The B. at the adverſe K. R. fourth ſquare.
Bl. The R. takes the R.

26.

Wh. The B. retakes the R. *(l)*

NOTES.

(k) If, inſtead of playing your King, you had puſhed your Queen's Biſhop's Pawn, you would have loſt the game; becauſe your adverſary, by puſhing his Queen's Biſhop's Pawn would have forced you to take with your Queen's Pawn, and afterwards have attacked your Rook and your Biſhop at once with his Knight.

(l) The Biſhop having retaken the Rook, it is evident that it is become a draw game, unleſs ſome very great error is committed. This game ſhews, that a Gambit equally well attacked and defended, is never a deciſive party on either ſide; it is true that he who gives the Pawn has the pleaſure of always having the attack, and the proſpect of winning, which would be a certainty, if he who is on the defenſive did not play regularly well for the ten or twelve firſt moves.

NOTES.

(a) A better way of playing this, would be to advance your King's Biſhop's Pawn two moves; as you will ſee by a back game.

(b) There are two other ways of playing this; the firſt, by playing the King's Biſhop to the Queen's Biſhop's fourth ſquare; and the other, by puſhing the Pawn of that ſame Queen one move; which will make the ſubject of two back games.

(c) He might have removed his Queen to two other ſquares, but this is the beſt; for had he made her retire to your King's Knight's fourth ſquare, you might have taken his King's Biſhop's Pawn by giving check, and perhaps afterwards have forced his Queen, and if he had carried her to his King's Rook's third ſquare, you muſt have attacked the ſame King's Biſhop's Pawn with your King's Knight, which would entirely have decided the game in your favour.

NOTES.

(d) It is eſſential in the Gambits to play this Pawn, that you may afterwards be able to place your Queen at her Knight's third ſquare, by ſo doing you ſtrengthen your poſition and perplex your adverſary, eſpecially if he has played his Queen's Biſhop, without attacking one of your pieces. See reſpecting this the fifth and ſixth back-games of the firſt Gambit.

(e) If, inſtead of playing this Knight, he was to take your King's Knight, a third back game will ſhew you how to act.

(f) If, inſtead of taking your Queen, he had given check, a fourth back game will ſhew you how he would loſe the game.

(g) I have given it as a general rule, always to unite your Pawns, and bring them into the centre. Here is, however, an exception for two reaſons; firſt, if you retake with your King you gain a Pawn, your adverſary not being able to prevent it; ſecondly, the Queen's being exchanged, your King has nothing to fear, and by bringing him into play, he may be as uſeful to you as any other of your pieces.

(h) Your King would not be ſafe on that ſquare, if your adverſary had yet a white Biſhop to drive him from that poſt; but, as it is, your King ſuſtains all your Pawns.

NOTES.

(i) You might have played this Rook to your King's ſquare; but in this caſe your Queen's Rook would have been almoſt uſeleſs to you; it is better therefore to retard your attack, and get all your pieces into action.

(k) He prepares to puſh his Queen's Pawn one move, to break your centre; but you muſt prevent it by putting him under the neceſſity of defending himſelf.

(l) He endeavours to attack you on your left, and make an opening for his Rooks.

(m) You would have played wrong had you taken his Knight with your Biſhop, becauſe by retaking your Biſhop with his Pawn, that very Pawn would obſtruct the paſſage of your Knight; it was therefore neceſſary to play this Knight firſt, in order to have no uſeleſs pieces.

(n) If he had taken your Knight, you muſt have retaken with the Pawn, and afterwards attacked his King's Biſhop's Pawn, by playing your Queen's Rook to its King's ſecond ſquare.

30.

Wh. The R. takes the adverſe Q. Kt. and wins the game.

NOTES.

(o) If, inſtead of playing the Rook, he had taken your Pawn, you would have won the game in a few moves, becauſe he would have loſt his Queen's Biſhop's Pawn; ſo, if he had taken your Knight with his own, you would have taken his Pawn with yours, in giving check by diſcovery.

(p) If he had played his King inſtead of his Queen's Rook, you might have given check with your Queen's Rook, and taken that of his King. It muſt be obſerved here, that what has decided the game in favour of the white, is, that the King having been in a ſituation fit for action, has been as uſeful as the beſt of his pieces.

NOTES.

(a) I make the white take that Pawn to ſhew you that it muſt cauſe the loſs of the game; the beſt move in this puzzling ſituation would have been to play your Queen to your King's ſecond ſquare.

(b) He expoſes your King's Biſhop to be taken by his Queen.

(c) So ſituated he cannot chuſe but win.

Bl. The Q. B. at his K. third ſquare.

8.

Wh. The K. caſtles
Bl. The Q. Kt. at his Q. ſecond ſquare.

NOTES.

(a) If he had puſhed this Pawn but one move, it would have intirely changed the game; therefore, I make it the ſubject of a back game.

N. B. It is the beſt way of playing it, in order to avoid the ſnares of your adverſary in the Gambit, when you receive the advantage of a piece.

(b) Was he to take your King's Biſhop's Pawn with his King's Pawn, it would form quite a different game, which ſhall be the ſubject of a back game.

(c) So ſituated, the game muſt appear entirely equal on both ſides: it is, however, to be obſerved, that you have the advantage, becauſe on your left wing you preſerve four Pawns on your Queen's ſide, whilſt your adverſary's Pawns are divided three by three, and all ſeparated from the centre.

17.

Wh. The B. takes the Kt.
Bl. The B. retakes the B.

NOTES.

(d) As it was indifferent to him whether he caſtled on the King's or on the Queen's ſide, I have already given, for ſuch caſes, a general rule for attacking the Pawns; however, for further inſtruction, I ſhall give a back game on that move.

(e) It would have been wrong had he not caſtled on his Queen's ſide, becauſe by puſhing his King's Rook's Pawn, he had forced your Biſhop to retire; but, at preſent, it is your intereſt to excite him to puſh the Pawns that cover his King, that you may the eaſier form your attack.

(f) If he had not removed his Queen, to replace her with the King's Biſhop, the play of this Knight would have perplexed his game.

(g) If, inſtead of playing his Queen, he had taken your Knight, you muſt then have retaken with your Queen, to put him upon endeavouring to ſave the mate, with which he was threatened.

23.

Wh. The Q. takes the P. and gives check.
Bl. The K. at his R. ſquare. *(l)*

24.

Wh. Takes the R. P. and gives a perpetual check.

5.

NOTES.

(h) If, inſtead of taking, he had withdrawn his Biſhop, you would then have taken his King's Knight's Pawn with your Knight, and that would have given you the game.

(i) If he had attacked your Queen with his Biſhop, inſtead of playing his Rook, you would have taken his Biſhop with your King's Rook; this, by making an opening upon his King, would have given you an eaſier attack.

(k) If he had not played his Queen to that ſquare, you muſt have taken his Biſhop with your Rook, and you would certainly have won the game.

(l) If, inſtead of withdrawing his King, he had covered him with his Queen, you muſt have taken his Biſhop, giving him check; and you would have remained afterwards with two Pawns and a Biſhop againſt a Rook only, beſides a good attack, which was enough to win the game; but, as he has played his King inſtead of his Rook, you cannot do better than to make an end of the party by a drawn game, with a perpetual check.

NOTES.

(a) If, inſtead of playing this Biſhop to his third ſquare, he had played him to his King's ſecond ſquare, you would have won the game in a few moves, as you will ſee by a back game.

(b) If he did not ſacrifice his Biſhop, you would certainly win the game; but loſing him, and preſerving three Pawns for that piece, he muſt become your conqueror by the ſtrength of his Pawns, provided he is not too haſty in puſhing them forwards before he has got out all his pieces.

NOTES.

(c) By puſhing this Pawn two moves you had given his Knight a free entry into your game, which would have loſt you the party. The ſubject of a back game.

(d) This move is of great conſequence to him for enſuring the party, becauſe it hinders you from attacking his King's Knight with your Queen's Biſhop, which would have enabled you to ſeparate his Pawns, by ſacrificing a Rook for one of his Knights, which would have turned the game in your favour.

(e) He plays this Knight to take your Queen's Biſhop, who would otherwiſe be troubleſome to him, was he to caſtle on his Queen's ſide. Here we may obſerve, as a general rule, that when either has advanced Pawns, the beſt way is to ſtrive to get rid of the adverſe Biſhops, becauſe they can oppoſe the Pawns, and ſtop their way much better than any other piece.

(f) Not knowing how to ſave your Biſhop, you play your Queen to replace him.

(g) He offers to exchange Queens to break the direction of yours, ſo that he may place his own at her third ſquare, in caſe you refuſe to take her.

(h) If you did not take the Queen, your game would be in a ſtill worſe plight.

NOTES.

(k) You muſt never yield up the paſſages, nor ſuffer your adverſary to double his Rooks; to that end it is that he propoſes to change piece for piece.

(l) He plays this in order afterwards to puſh his King's Knight's Pawn upon your Knight, thereby to force him from his poſt; but if he had puſhed his Knight's Pawn before he played this, your Knight, poſted at your King's Rook's fourth ſquare, would have ſtopped the progreſs of all his Pawns.

(m) Had he given check with his Rook's Pawn, inſtead of playing this, he would have acted entirely contrary to the inſtruction given in the firſt party. *Vide note (x).*

NOTES.

(a) Had you puſhed this Pawn but one move, your adverſary would have ſhut up your Queen's Biſhop during half the game. The ſubject for a back game.

(b) If, inſtead of playing this, he had ſuſtained the Gambit's Pawn, he would have loſt the game; as will be ſeen by a back game: but, if he had neither puſhed this Pawn nor taken the Gambit's Pawn, you muſt have puſhed your King's Biſhop's Pawn two moves, in order to have three Pawns in front.

(c) Otherways, had you taken his King's Pawn, you would have loſt the advantage of the attack. The ſubject of a back game.

(d) If he had played any thing elſe, by puſhing your King's Biſhop's Pawn two moves, you would have procured for your pieces an intire liberty to act.

NOTES.

(e) If, inſtead of playing your Knight, in order to get rid of his King's Biſhop, according to the rule preſcribed in the firſt party, note *(c)*, you had taken the Gambit's Pawn, you had loſt the game. The ſubject of a back game.

(f) If, inſtead of taking your Knight, he had played his Biſhop to your Queen's fourth ſquare, you might have attacked him with your King's Knight, and taken him the ſubſequent move.

(g) If he had puſhed his Queen's Knight's Pawn two moves, in order to ſuſtain the Gambit's Pawn, he had loſt the game; (the ſubject of a back game) and if, inſtead of either of theſe two moves, he had choſen to take your King's Pawn, your retaking it would have hindered him from taking yours again with his Knight; becauſe, he would loſe the game by your giving him check afterwards with your Queen.

(h) This particular move requires a back game: if you had retaken his King's Biſhop's Pawn with your King's Biſhop's Pawn, you would have loſt the game.

FIRST REGULAR PARTY,

With four back games; the firſt on the third move of the Black, the ſecond on the fourth move of the White, the third on the fifth move of the Black, and the laſt on the ſixth move of the White.

Wh. The R. P. two moves.

Bl. The ſame. *(e)*

5.

Wh. The Q. at her K. ſecond ſquare.
Bl. The Q. P. one move. *(f)*

NOTES.

(a) This is the beſt place the King's Biſhop can occupy in the firſt moves of a party; here, he batters upon the adverſe King's Biſhop's Pawn, againſt which the firſt attacks are generally formed.

(b) The Black being able to play two or three different ways, we will make two different parties of it.

(c) He prevents you from eſtabliſhing two Pawns a-breaſt, and occupying the centre. On that move, the Black has three other ways of playing, which will make the ſubject of two variable, and one back game.

(d) If you had moved this Knight to your King's ſecond ſquare, you would have loſt the game. The ſubject of a back game.

(e) It would have been bad play for him to have taken your King's Biſhop's Pawn. Another ſubject for a back game.

(f) Had he attacked your King's Biſhop's Pawn with his Knight, it would have given you time to eſtabliſh your Pawns in the centre. A new ſubject for a back game.

6.

Wh. The Q. P. one move. *(g)*
Bl. The Q. B. P. one move. *(h)*

7.

Wh. The K. R. P. one move.
Bl. The ſame. *(i)*

8.

Wh. The Q. B. at his K. third ſquare. *(k)*
Bl. The K. B. takes the B. *(l)*

NOTES.

(g) If you had puſhed this Pawn two moves, you might have occupied the centre for a moment, but could not have kept it long; as will be ſeen by a back game.

(h) If he had moved his Queen's Biſhop to your King's Knight's fourth ſquare, you ſhould immediately have puſhed your King's Rook's Pawn one move; you muſt never leave your pieces under the controul of the Biſhop's direction, if you can help it.

(i) The Pawns have been played on both ſides to prevent the Biſhops from becoming troubleſome to the Knights.

(k) When your Queen's Pawn cannot break the Direction of the adverſe King's Biſhop upon your King's Biſhop's Pawn, you muſt preſerve your Queen's Biſhop, in order to poſt him at your King's third ſquare; becauſe this Biſhop is the only piece which can be effectually oppoſed to the adverſe King's Biſhop.

(l) If he had moved back his King's Biſhop, inſtead of taking your Biſhop, he would have loſt a turn: when you exchange pieces it is an advantage to take firſt.

11.

Wh. The Q. Kt. at his Q. ſecond ſquare.
Bl. The ſame.

12.

Wh. The K. caſtles with his R.
Bl. The ſame. *(n)*

NOTES.

(m) You may now ſee the advantage of your King's Rook's Pawn being played at the ſeventh move, for he might at preſent attack you with his King's Knight, and afterwards play his King's Biſhop's Pawn to bring him again into action; theſe hits ought to be carefully improved, eſpecially in parties wherein your adverſary forces out your Knights before your Pawns.

(n) The game is now equal; the White has preſerved the advantage of the move; he who firſt can bring his King's Biſhop's Pawn into play, by puſhing it two moves, will undoubtedly gain the advantage of ſituation.

FIRST BACK GAME,

On the third move of the Black.

3.

Wh. The Q. B. P. one move.

Bl. The K. takes the B. *(c)*

6.

Wh. The Q. at the adverſe K. R. fourth ſquare.
Bl. The K. Kt. P. one move.

7.

Wh. The Q. takes the K. B. and will have a very good game.

NOTES.

(a) He plays this Knight to hinder you from puſhing your Queen's Pawn two moves. If, inſtead of this Knight, he had played his Queen's Biſhop's Pawn one move, your next move might equally take place.

(b) He might have prevented this move, by bringing back the Biſhop to his Queen's Knight's third ſquare, which move will make a ſupplement to this back game.

(c) If he does not take your Biſhop, you muſt take his King's Knight, and puſh your Queen's Knight's Pawn two ſteps attacking his Biſhop, and afterwards puſh upon his Queen's Knight, in order to retake the Pawn with your Queen's Biſhop's Pawn.

Bl. The K. B. P. two moves. *(c)*

11.

Wh. The Q. Kt. at his B. third ſquare.
Bl. The Q. B. at his K. third ſquare. *(d)*

NOTES.

(a) If on that move he withdraws his King's Knight, he gives you an opportunity of eſtabliſhing your Pawns in the centre.

(b) He takes this opportunity to ſtop the progreſs of your King's Biſhop, and to get an advantageous poſition for his Knight.

(c) He puſhes this Pawn two moves, in order to be able to place his Queen's Biſhop at his King's third ſquare.

(d) In this ſituation the Black have as good a game as the White; there is indeed a Pawn paſſed and ſuſtained on the ſide of the White, but this advantage is quite counterbalanced by the poſt of the Royal Knight of the Black, who cannot be diſlodged but by changing piece for piece, and in that caſe, the Pawns of the Black would reunite in the centre, giving, equally to them as to the White, a paſſed Pawn.

SECOND BACK GAME,

On the fourth move of the White.

4.

Wh. The K. Kt. at his K. ſecond ſquare. *(a)*
Bl. The K. B. takes the P. and gives check.

5.

Wh. The Q. P. two moves.
Bl. The Q. takes the B.

7.

Wh. The Q. Kt. at its R. third ſquare.
Bl. The Q. at her K. third ſquare. *(b)*

NOTES.

(a) If this move did not coſt you a Pawn, it would undoubtedly be the moſt convenient place for the Knight; becauſe, here he does not obſtruct the paſſage of the Pawns. See the ſupplement of this ſecond back game on the ſame move.

(b) The Black muſt win the game, having the advantage of a Pawn, and a good ſituation beſides.

SUPPLEMENT

To this laſt ſecond back game, on the fourth move of the White

4.

Wh. The K. Kt. at his B. third ſquare
Bl. The K. B. takes the P. and gives check. *(a)*

5.

Bl. The K. Kt. at his B. third ſquare.

10.

Wh. The K. R. at its K. own ſquare.
Bl. The K. caſtles. *(b)*

NOTES.

(a) There is no diſadvantage in not being able to caſtle, when your pieces can eaſily get out; very often it is even better ſo, provided your King be ſafe.

(b) So ſituated, the White has the advantage, his pieces being better brought out, and more conveniently arranged.

THIRD BACK GAME,

On the fifth move of the Black.

5.

Wh. The Q. at her K. ſecond ſquare.
Bl. The K. Kt. at the adverſe K. Kt. fourth ſquare.

6.

Wh. The Q. P. two moves.
Bl. The K. P. takes the P.

Bl. The K. caſtles. *(c)*

10.

Wh. The K. caſtles
Bl. The Q. P. one move.

11.

Wh. The K. R. P. one move.
Bl. The ſame.

12.

Wh. The Q. B. at his Q. ſecond ſquare. *(d)*

NOTES.

(a) If he takes this Knight with his Biſhop it will mend your game, becauſe this move will bring your Pawns into the centre.

(b) Here you might puſh your King's Pawn one ſtep, and get two moves by ſo doing; but this Pawn once puſhed, your adverſary would offer you twice the exchange of the Pawn, by puſhing one ſtep his Queen's Pawn, as well as that of his King's Biſhop; your Pawn would then remain alone and ſeparate; it is therefore better to leave your two Pawns a-breaſt, to avoid opening your game.

(c) He caſtles in order to attack your King's Pawn with his Rook; you muſt therefore caſtle likewiſe, that in caſe of an attack you may ſuſtain it with your King's Rook.

(d) It is pretty evident that the White has the better game, having the advantage of three moves more than the Black, and the Pawns beſides farther advanced: nothing remains on the ſide of the White but to diſengage the King's Biſhop's Pawn as ſoon as poſſible, that will decide the game entirely againſt the Black.

FOURTH BACK GAME,

On the fixth move of the White.

6.

Wh. The Q. P. two moves.
Bl. The K. P. takes the P.

7.

Wh. The Q. B. P. retakes the P.
Bl. The K. B. gives check.

8.

Wh. The Q. B. covers the check.
Bl. The B. takes the B.

9.

Wh. The Q. Kt. retakes the B.
Bl. The Q. P. one move. *(a)*

NOTE.

(a) This party is entirely equal on both ſides; your Pawns in the centre are broken; one may, however, venture this way of playing with an antagoniſt to whom you give ſome advantage.

SECOND REGULAR PARTY,

Various from the ſecond move of the Black.

1.

Wh. The K. P. two moves.
Bl. The Same.

2.

Wh. The K. B. at his Q. B. fourth ſquare.

Bl. The K. caſtles. *(b)*

6.

Wh. The Q. R. P. two moves.
Bl. The Same. *(c)*

7.

Wh. The K. caſtles.
Bl. The Q. B. at his K. third ſquare. *(d)*

NOTES.

(a) Though the getting out the pieces before the Pawns muſt be avoided as much as poſſible, I think this play is abſolutely neceſſary in the preſent ſituation, to keep the advantage of the move; nevertheleſs, you might on the ſame move puſh your King's Biſhop's Pawn two ſteps: ſuch a game, tho' dangerous in itſelf, is very good againſt a player to whom ſome advantage is given.

(b) If, inſtead of caſtling, he had played his Queen's Biſhop to your King's Knight's fourth ſquare, you might have played your Queen to his Knight's third ſquare, which would have given you the game; but was he to play the ſame Biſhop to his King's third ſquare, take him with yours, and afterwards play your Queen to her Knight's third ſquare.

(c) If he had not played thus, his King's Biſhop muſt have been forced by your Pawns.

(d) Had he played this ſame Biſhop to your King's Knight's fourth ſquare, you muſt have puſhed your Queen's Pawn one move; and was he to take your King's Knight with his Biſhop, you would retake with your Knight's Pawn, the better to bring your Rooks into play, as they then might attack the Pawns that cover the adverſe King.

NOTES.

(e) Your Queen attacks two Pawns, which your adverſary cannot ſuſtain any otherways than by playing his Queen to her Biſhop's ſquare; this ſituation often takes place in the firſt moves of any party whatſoever, and very frequently your adverſary finds himſelf in the impoſſibility of ſuſtaining the two Pawns at once.

(f) If he had played his Biſhop to your Queen's Knight's fourth ſquare, you muſt have ſuſtained your Royal Pawn with your Queen.

(g) Doubled Pawns, when not ſeparated, are as good as the others, and even ſometimes more profitable.

(h) He plays this Pawn to hinder your Knight from attacking his King's Pawn, as otherways he would be forced to defend it with his Rook, which would afford you time to double your Rooks on the column of your King's Biſhops. It is proper to obſerve, that in almoſt every caſe, whoever makes himſelf maſter of an opening with his double Rooks, muſt have the advantage; it is therefore the adverſary's buſineſs never to yield up theſe kind of paſſes.

NOTE.

(i) So ſituated, the White muſt have chiefly in view to oblige the adverſary to puſh his King's Pawn one ſtep, ſo that he may place a Knight, ſuſtained by two Pawns, at the fourth ſquare of the ſame King's Biſhop, which ought to decide the game entirely in his favour: the Black then ought, in oppoſition, to ſeek the means of doubling the two Rooks, and bringing the Queen's Biſhop's Pawn again into play, by puſhing him two moves.

NOTES.

(a) He prepares to puſh his Queen's Pawn two moves, in order to break the direction of your King's Biſhop, occupy the centre of his Pawns, and retake from you the advantake of the move.

(b) He might, according to his firſt deſign, have puſhed his Queen's Pawn two ſteps. This will furniſh the ſubject for a back game.

(c) If he had played his King's Knight to his Biſhop's third ſquare, you muſt have attacked this Knight with your King's Pawn, by which play you would have won many moves.

(d) As he cannot break the direction of your King's Biſhop with his Queen's Pawn, he oppoſes the Biſhop of his Queen to that of your King; if, inſtead of this move, he had advanced his King's Biſhop's Pawn two ſteps, you muſt then have puſhed your King's Pawn.

(e) He makes this move in order to break your Pawns in the centre, or to be able to eſtabliſh himſelf there ſtrongly on his Queen's ſide: he would have played wrong, had he puſhed his Queen's Biſhop's Pawn upon your Queen. The ſubject of a back game.

NOTES.

(f) It would be bad play on his ſide to retake with his Queen's Biſhop's Pawn, becauſe his pieces would again be ſhut up; beſides they would occupy leſs ground than yours.

(g) It would be wrong to give check with your Queen, ſhe ought never to be removed from the centre; you muſt, on the contrary, keep her behind your Pawns, eſpecially in the beginning of a party.

(h) It would, again, have been very bad play for him to have puſhed his Queen's Biſhop's Pawn; and a back game on this move will ſhew of how great a conſequence it is, when you have a knot of Pawns, to puſh the leading one forwards.

(i) This move is very neceſſary to prevent him from puſhing his Queen's Biſhop's Pawn, which would bring two of his Pawns a-breaſt upon your ground; beſides, affording a favourable opportunity for his Biſhop to get out.

(k) If he had puſhed his Queen's Knight's Pawn two ſteps, you would have won a Pawn, by attacking his Queen with your Queen's Knight.

(l) This party is quite even, the poſition is as good on one ſide as on the other, the two Biſhops are both entangled, and the Rooks entirely free.

11.

Wh. The K. caſtles. *(c)*

NOTES.

(a) If, inſtead of giving check, you had removed this Biſhop to your Queen's third ſquare, you would have loſt the advantage, both of the move and of the ſituation, becauſe he would immediately have made himſelf maſter of the centre, by puſhing his King's Pawn.

(b) If he had ſuſtained this Knight in any other manner, he would have loſt him, by your immediately puſhing your King's Biſhop's Pawn two moves.

(c) Such being the ſituation of the game, muſt have chiefly two objects in view: firſt, to preſerve the Queen's Biſhop, who, by his direction, is very troubleſome to the adverſe King, and next to attack the Queen's Pawn, which being ſeparated from the other Pawns, can no longer be ſuſtained but by the pieces: it is always advantageous to attack a ſeparated Pawn, were it only to employ the adverſary's pieces.

13.

Wh. The Q. B. at his K. third ſquare.
Bl. The Q. Kt. at the adverſe Q. Kt. third ſquare.

NOTES.

(a) This move entirely decides the game. You muſt leave him no other opportunity of puſhing his Queen's Pawn; if you ſucceed, his King's Biſhop muſt remain impriſoned, and, beſides, your pieces will cover much more ground than thoſe of your adverſary.

(b) This move is eſſential, he would otherways have attacked your Queen with his Queen's Knight, and thereby have got one piece more on his Queen's fourth ſquare, in order, next, to puſh his Queen's Pawn, and by that means diſengage his pieces.

(c) If you had been able to have removed your Queen's Biſhop to his King's third ſquare, he would have played his King's Knight to his fifth ſquare, in order to take your Biſhop, and free that of his King; beſides, it is advantageous to preſerve, as much as poſſible, a Biſhop of the ſame colour as that of your adverſary. The directions of the Biſhops are very dangerous, in almoſt all caſes; and the beſt way to ward off their attacks, is to oppoſe Biſhops to Biſhops.

(d) He plays this Knight in order to exchange him for your Biſhop.

Bl. The Q. Kt. at his R. fourth ſquare.

19.

Wh. The K. caſtles. *(h)*

NOTES.

(e) None of theſe moves are dangerous, becauſe they do not break your centre; and you may diſlodge theſe ſame Knights whenever you pleaſe; this proves that real attacks are to be made only with the help of ſeveral united pieces, and very ſeldom ſucceed with one or two.

(f) He makes this move in order to hinder your Queen's Knight from attacking his own Queen's Pawn.

(g) Inſtead of moving this Knight, he might have ſuſtained him by playing his Queen to her Knight's third ſquare; but then you would have puſhed your King's Knight's Pawn.

(h) In this ſituation the White muſt win, if it is poſſible to prevent the adverſe Queen's Pawn from advancing, and by not being too haſty in puſhing the Pawns on the right wing, till the King is ready to ſuſtain them.

18.

Wh. The Q. Kt. P. retakes the B.
Bl. The K. caſtles. *(f)*

NOTES.

(a) If he takes your Knight, his Queen's Pawn muſt neceſſarily fall into your hands, becauſe it cannot be ſuſtained by any other Pawn; beſides, you may attack it with all your pieces.

(b) He plays this Knight to get rid of your Biſhop, and open afterwards a free paſſage for his King's Biſhop upon your King and Queen, which would prove very dangerous.

(c) You play this Rook with a view either to oblige him to ſuſtain the Pawn of his Queen, or to take the Knight of yours.

(d) You might have taken his Queen's Pawn with your Knight, and afterwards played your Queen to your King's fourth ſquare to force his Knight; but he would then have diſentangled his Queen by giving check, ſo that this move is abſolutely neceſſary.

(e) Not being able any longer to ſuſtain his Queen's Pawn, he finds himſelf forced to take your Knight, to preſerve that Pawn.

(f) In this ſituation, the White muſt win the game, the only thing now is to hinder the adverſe Queen's Pawn from coming again into play, and to ſuſtain your centre without advancing your Pawns too haſtily.

(a) You might puſh this Pawn only one move, but then your ſituation would be the ſame as that already ſhewed in the firſt variation.

(b) Inſtead of taking, you might puſh the King's Pawn one move, which would not be amiſs againſt a player to whom ſome advantage is given. The ſubject of a back game.

(c) By the removal of this Biſhop to his Queen's Knight's third ſquare, the adverſary is allowed to eſtabliſh his Pawns in the centre—both our former editions have fully proved it.

(d) Had he not playd in this manner, he would have given you time to occupy the centre with your Pawns—this, as we ſaid above, has already been ſufficiently proved.

NOTES.

(e) You might give check with your Queen at your King's ſecond ſquare, but this move would enable your adverſary to get out his Queen's Biſhop; beſides, the King and Queen are never to be placed on the ſame line, when that is opened and unguarded by the Pawns.

(f) He plays this with a view, either to get out his Queen's Biſhop, or to get rid of your King's Biſhop.

(g) You puſh this Pawn to break the chain of Pawns that cover his King.

(h) As he has puſhed his King's Biſhop's Pawn two moves, you muſt endeavour to poſt one of your Knights at the adverſe King's fourth ſquare, from whence he cannot be driven out by any piece unleſs he be taken, and then you may re-unite your Pawns in the centre.

(i) He will not re-unite your Pawns by taking your Knight.

NOTES.

(k) This move is neceſſary to prevent his Knight from poſting himſelf at your King's third ſquare.

(l) In theſe reciprocal poſitions, I ſhould think the White has the better game, on account of the place where the Queen's Knight ſtands; however, this advantage is not of ſuch conſequence as to decide the game on that ſide: the Black muſt be mindful not to take the Knight before he has deſtroyed one of the Pawns that ſuſtain him, which may be done by changing the Queen's Biſhop's Pawn againſt the adverſe Queen's Pawn, and then both games will be even.

NOTES.

(a) Had he withdrawn his Knight, that move alone would have given you the game.

(b) You might cover this check with your Queen's Knight, placing him at his Biſhop's third ſquare, and if he then played his King's Knight to your King's fourth ſquare, you would find ſome way of ſuſtaining your centre; in that ſituation, his beſt play would be to puſh his Queen's Pawn two moves.

(c) Had he puſhed this Pawn two moves, your centre would have been ſafe.

(d) If you had played your King's Biſhop's Pawn two moves, he might have broken your Pawns, by puſhing his Queen's Biſhop's Pawn two moves.

(e) It appears by theſe moves that the Black, by playing properly, have ſucceeded in breaking the central White Pawns. In this back game my deſign is to prove, how dangerous it is, when two Pawns ſtand on a front line in the centre, to advance one before your adverſary has offered to change one of thoſe Pawns, that by the way may ſerve to break thoſe very firſt Pawns; if, inſtead of having puſhed his Queen's and his Biſhop's Pawns only one move, he had advanced either of them two moves, your centre would have remained ſafe.

NOTES.

(a) As, inſtead of this move, he might have played his Queen to your King's Rook's fourth ſquare, it will be the ſubject of a back game.

(b) He forces you to get out your King's Knight before your Pawn; but, after the firſt moves, you muſt think of the proper means of bringing him again into play. You might have prevented this move with your Queen; but ſhe is better at her home, becauſe there ſhe enables you to advance, with real force, the ſame Queen's Pawn upon his King's Biſhop.

(c) He plays his Knight in order to hinder you from puſhing your Queen's Pawn two moves, nevertheleſs this move may be ventured. A new ſubject of a back game.

(d) It is not always advantageous to puſh the Pawns on the wings; and they muſt be advanced cautiouſly.

(e) If he had advanced this Pawn two moves, you muſt have puſhed yours upon his Knight, according to the rule already preſcribed, always to advance the attacked Pawn.

NOTES.

(f) Not being able to break your King's Biſhop's direction with his Pawns, he ſtrives to do it with his Queen's Biſhop.

(g) He might retake this Biſhop with his Pawn, and it would be no bad play.

(h) If he had caſtled on his Queen's ſide, he would have yielded to you the advantage of the ſituation.

(i) Had you not taken this Pawn, he would have advanced it one move more upon your Biſhop, have diſlodged him, and got an eaſy attack upon your King's wing with his Pawns.

(k) Now, the buſineſs of the White muſt be to change the King's Biſhop's Pawn with the adverſary's Royal Pawn, and that will turn the advantage on his ſide.

NOTES.

(a) On this move the King's Knight might be played to his Biſhop's third ſquare.

(b) If, inſtead of withdrawing his Queen, he had taken your King's Biſhop's Pawn, by giving check, you muſt have taken his Biſhop with your Queen; you would have gained a piece by it.

(c) Though the Rook's third ſquare is not the beſt place for the getting out the Knights, it becomes, however, neceſſary in the preſent ſituation.

(d) Had he withdrawn this Knight you muſt then have placed yours, now attacked, at his Biſhop's ſecond ſquare, and then have carried your Queen's Biſhop to your King's third ſquare, to get rid of his King's Biſhop.

(e) It is evident, that the White have ſeveral moves over the Black, and that, becauſe the Black have been too haſty in getting out the Queen, and that, even now, ſhe has not reached the place where ſhe ſhould properly ſtand.

NOTES.

(a) This way of opening the game, when you have not the move, is entirely defenſive, and far from being the beſt, eſpecially if ſome advantage is granted; but it is a very good one for trying the ſtrength of an adverſary with whoſe ſkill you are unacquainted.

(b) On this move he might have forced you to play the Gambit, by puſhing his King's Pawn two moves; and you could not have taken without being expoſed to a check from his Queen; and he would have won the game.

(c) You might have puſhed your Queen's Pawn two moves, in order to change it with his Queen's Biſhop's Pawn, and this move would not be amiſs; but then, you muſt preſerve your Queen's Biſhop, to oppoſe, in caſe of need, to his Royal Biſhop, who, as he might place himſelf at his Queen's Biſhop's fourth ſquare, would hinder you from caſtling on your right ſide, and beſides, prove very troubleſome to all your pieces.

NOTES.

(d) Inſtead of this, he might have played his Queen's Pawn one move; in that caſe, you muſt have taken his Pawn with yours, to hinder him from forming the ſame poſition on the ſide of his Queen, who is now ſtanding on your King's ſide.

(e) It would be bad play in him to take your Pawn, as that would be clearing the way for your Queen's Knight to get out; ſo it would be wrong for you to take his Pawn with yours, thereby giving an advantageous place to his King's Biſhop.

(f) He attacks your Queen's Knight's Pawn in order to induce you to puſh it again one move, but it is better to ſuſtain it, for if you advance it, he may, by puſhing his Queen's Rook's Pawn two moves, form a very ſucceſsful attack on your left wing.

(g) Had he attacked your Queen's Biſhop with this Knight, you muſt not have given him leave to change piece for piece; but have withdrawn your Biſhop, and afterwards have forced his Knight to retreat.

NOTES.

(h) As your Queen's Knight cannot get out, without expoſing you to the riſk of having either a Pawn doubled, or your Queen forced, it is neceſſary to get rid of his King's Biſhop.

(i) You play this Knight that he may rejoin your King's Knight at your Queen's fourth ſquare; it is the beſt place he can have now. In general, when one has two Knights, it is eſſential to keep open a free communication between them, and poſt them on ſuch ſquares where they can neither be attacked by the Pawns nor forced to retreat.

(k) He puſhes this Pawn with a view to break your centre, and it would be wrong play in you to take it.

(l) He plays ſo, with a deſign to make an opening for his King's Rook, and were you to give him time for puſhing this Pawn another move, he could force and break the rear of your chain of Pawns.

NOTES.

(m) As your King's Knight, ſuſtained by two Pawns, may ſafely place himſelf at his fifth ſquare, ſo your adverſary takes your Pawn, that he may procure for his King's Knight a ſimilar poſt.

(n) He plays this Rook, to ſecure the command of the line. Here is an inſtance where a Rook may well be ſacrificed for another piece. Suppoſing that you do not cloſe this line with your Knight, he would remove his Rook to your King's Knight's fourth ſquare, where, ſupported and ſuſtained by two Pawns, it could not be taken without re-uniting his Pawns.

(o) He plays this Knight with a deſign of procuring him as good a place as yours now occupies.

(p) By this move you break the direction of his Queen, and your two Knights are now re-united to attack and take his King's Pawn

NOTES.

(q) It would be dangerous to caſtle on your left, becauſe he might eaſily form his attack upon your King; beſides, in that poſition, your King muſt occupy his Knight's third ſquare, in order to keep in the adverſe King's Knight, and in the mean while ſuſtain your Pawns.

(r) This move is neceſſary to prevent his making himſelf maſter of that line, by changing his Knight for yours, that poſition alone would give him the game. You muſt always oppoſe your Rooks to the adverſary's Rooks, and never yield up the openings to him. At preſent the game is nearly even; nevertheleſs, as there is a Pawn advanced on the ground of the Black, the White may be ſaid to have ſome little advantage.
